Coimbatore - 641 111.

**R.No. 1428/ A3 / 2022 (498) CWA/CBE, M.234**

**Dated: 07.11.2022.**

Sir,

**Sub:** Report on Examination of water sample from ELGI School,  
S.F.No.535/1,2,3A, Kovai Mahalingapuram, Vellalore, Coimbatore -  
Collected on 02.11.2022.

\*\*\*\*\*

A sample of water stated to have been collected on 02.11.2022 from the Water Doctor near LKG Room at ELGI School, S.F.No.535/1,2,3A, Kovai Mahalingapuram, Vellalore, Coimbatore, Source - Packaged Water (Sai Marketing, 212, School Street, Sundakamuthur, Coimbatore) by Thiru. C.Subramani, Accountant was received at this laboratory on the same day from the above addressee to assess its suitability for drinking purpose.

The results of analysis are furnished overleaf.

The sample of water is Colourless and clear in physical appearance.

Judged by the results of analysis it is of satisfactory bacteriological quality for drinking.

However, the chemical analysis reveals that, it is very soft. The total hardness content is only 4mg/l. The Calcium and Magnesium are almost removed from this water. The Calcium and Magnesium are very essential minerals for healthy living of human beings. Consumption of water having very low content of Calcium and Magnesium for a prolonged time will be deleterious to the health of the consumers.

Hence, it is advised that, the supplier of the packaged water should be contacted immediately along with a copy of this report to set right in such a way that, the water contains atleast a minimum 30 mg/l of total hardness, so as to have some amount of Calcium and Magnesium which are very essential minerals for a healthy life.

The Water Doctor should always be maintained periodically as per the supplier's manual to get hygienic safe water at all times.

**However, this report is pertinent to this batch only. It should not be used for other batch.**
